Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "312" and "314" in Figure 3. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Information Disclosure Statement

2. The information disclosure statement filed 2/12/02 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the

examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 6 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claim limitations disclose agents becoming layer 4 routers. This becoming a layer is not disclosed in the specification.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Yi, USPN 6,813,715.

7. Regarding claim 8, Yi discloses a system comprising: a home server including a service component, the service component to detect when a server application listens for a connection [ie. home server behind a firewall, Yi, col. 2, lines 6-14 and col. 4, lines 11-21]; a remote client coupled through the Internet and to the system by an internet agent, the Internet agent listening on behalf of the home server for connection requests from a remote client [ie. client to ISP, Yi, col. 4, lines 11-21]; a forwarding agent connected to the home server, wherein the service component informs the forwarding agent that the server application is listening for a connection and forwards the access parameters to the forwarding agent, the forwarding agent to provide the Internet agent with access parameters received from the home server [ie. firewall, Yi, col. 4, lines 25-42 and col. 5, lines 25-42]; and a gateway running a Network Address Translation (NAT) software program, the gateway connecting the forwarding agent to the Internet agent via the internet [Yi, col. 1, lines 23-40]; wherein, if the remote client provides proper access parameters to the Internet agent, the Internet agent provides the remote client access to a service running on the home server [ie. user authentication, Yi, col. 4, lines 25-42].

8. Regarding claim 9, Yi further discloses the forwarding agent establishes an outgoing connection with the internet agent through the NAT, to provide a channel for incoming connection requests [Yi, col. 1, lines 41-53 and col. 5, lines 1-20].

9. Regarding claim 10, Yi further discloses the Internet agent and the forwarding agent become layer 4 routers [Yi, col. 5, lines 1-20].

10. Regarding claim 11, Yi further discloses the service component allows access to the server application by a remote client by: inquiring whether a user would like the server application to be accessible from a remote client and setting required access parameters [Yi, col. 4, lines 43-61].

11. Regarding claims 1-7 and 12-27, claims 1-7 and 12-27 have similar limitations as claims 8-11. Therefore, the similar limitations are disclosed under Yi for the same reasons set forth in the rejection of claims 8-11 [Supra 8-11].

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason D Cardone whose telephone number is (571) 272-3933. The examiner can normally be reached on Mon.-Thu. (6AM-3PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Valencia Martin-Wallace can be reached on (571) 272-6159. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
